

## Population Projections for Surrey

Surrey-I also includes summaries and data about [population estimates](#), [population density](#), and [estimates for migration](#).

There were 1,196,236 residents of Surrey in 2020 and this is predicted to increase by 2.6 per cent to 1,227,467 in 2043.

The age profile of Surrey residents is predicted to shift as Surrey has an aging population. Surrey is predicted to have declining numbers of residents aged 35 to 54 by 2043 alongside growing over 60s. Children under the age of 15 are also predicted to decline in numbers by 2043 in Surrey. However, it is predicted that there will be increased numbers of males aged 25 to 34 in Surrey by 2043. An interactive version of the figure below is available [here](#) and presents the predicted age profiles for each of the local authorities in Surrey for every year until 2043.

### The projected population of Surrey, 2018 to 2043

The solid-coloured bars represent the population in 2043. The estimates were made by the ONS and were based on 2018 data (the dark lines are the 2018 figures).
